Test Coverage – Course and Tutor Registration Feature

Application: MindBridge AI Tutor

Prepared By: Mohammad Al-Atiyat

Date: November 11, 2026

Version: 1.0

Feature scope: Multi-step course and tutor registration workflow, including session browsing, cart management, and mock payment checkout.

Test Type	Description	Environment	Environment Justification	Pass/Fail
Functional	Verifies student can complete the full registration as intended; browse available sessions, add session to a car and complete payment	QA (localhost:8081)	Function testing is assigned to the QA because it requires a fully operational and polluted testing database.	Pass: The student can browse sessions, add carts, and place orders successfully. Fail: any step cannot be completed and shows an error
Negative/Erro Handling	Verifies how the registration workflow handles invalid or unexpected inputs	QA	Negative testing is assigned to Staging because it deliberates involves finding errors and triggering them.	Pass: Invalid Input clocks with clear message Fail: Any HTTP 500 error, application crash, to an order being place without right information
Regression	After dev changes something, rest everything that works to make	QA	Re-test everything after the defect DEF-001 is fixed.	Pass: Everything works and nothing breaks.

	sure the change did break anything.			Fail: another different feature or same defect doesn't work
Usability	Checking whether the app is easy to use for a real person	QA	Make sure all functions like buttons, adding to cart, and putting in card info are easy to process, and the user will have little trouble.	Pass: all functions are easy to use. The user could get a course from the home page to buy a course with ease. Fail: User has trouble navigating the page and finding what course he/she need to order. Problem through checkout
Responsive Design	Checking if app works on all OS and screen sizes	QA	Make sure test works on all browsers (Chrome, Safari, Firefox, etc.). Also make sure it works on phones, tablet, and laptops	Pass: Is responsive and useable in all browsers and devices. Fail: Using a phone for the site cover buttons and isn't usable or is much slower on a different browser.

Known Defects Affecting This Feature:

- Defect ID: DEF-002
- Description: the menu overlaps the content when the screen is under 400px wide, so users can’t use the page
- Visible In: User interface
- Recommended Test Environment: QA (localhost:8081)
- **Reason: This defect is a layout issue that can be reproduced simply by resizing it.**
